SUPPORTING DATACENTRE INFRASTRUCTURE

Environmental and Sustainability Policy Statement

PowerWorks Maintenance Services Ltd are committed to the principles of sound environmental management and to the aims of the reduction of harm caused to the environment through our activities.

To this end, we have selected the international standard BS EN ISO 14001 as the model for the management and control of all environmental related aspects of our business and will apply the principles of this standard in the identification and control of any activity which may have an adverse impact on the environment or our surroundings.

Our primary goals are therefore -

- To reduce all types waste produced a direct output from, or as a consequence of our activities and wherever possible ensure that we re-use and re-cycle rather than consume new raw product.
- To manage our activities in a way mindful of reducing the overall consumption of energy in the cycle of our business. This will ensure environmental benefits in many areas as well as being of overall economic benefit to the company.
- To help our customers by providing them efficiencies and reduction of environmental harm through intelligent design and provision of low wastage solutions, as well as ensuring through our support activities that our clients equipment be maintained in first class working condition and calibrated to provide optimum efficiency in use.
- To promote best environmental practices with our own staff and with our suppliers, through training and consultation.

To meet our environmental goals and to ensure compliance we will -

- Commit to the prevention of pollution.
- Commit to continual improvement in our processes and environmental controls.
- Comply with all applicable regulations, legal requirements and statutory laws.
- Manage our commitments through setting and reviewing all of our environmental objectives and targets.
- Provide the necessary funds and resources to meet our agreed commitments within the bounds and scale of our activities.
- Document and maintain our environmental management systems in a way that is both controlled and easily assessable.
- Communicate and promote our policy and environmental management aims to all staff and all of those working on behalf of our organisation.
